LDsystems 
free your sound

CURV 500[®] SERIES

With the patented CURV 500[®], LD Systems presents the first really portable array with WaveAhead[®] technology for high-definition audio quality with an amazing sound pressure and excellent balance. Thanks to the expandable vertical and horizontal coverage, the system is completely scalable. The unibody aluminum construction of the CURV 500[®] array satellites sets new standards and is essential for the outstanding sound quality of the system. The unique SmartLink[®] plug-and-play adapter also offers numerous mounting options. For all-in-one comfort, the 4-channel mixer integrated in the CURV 500[®] provides a range of digital effects, as well as modern Bluetooth[®] wireless technology. Three sets are available for mobile and fixed installation. They feature a low weight and a wide, far-ranging sound dispersion. Thanks to optional extensions, the systems can be perfectly expanded further. Black and white housing designs for the AV Set allow for harmonious integration into the surrounding architecture.

CURV 500® SERIES

PORTABLE ARRAY SYSTEM

FEATURES

- The first truly portable array system
- Up to 1000 watts RMS
- WaveAhead® technology for high definition audio
- For mobile and fixed applications
- Built-in 4 channel mixer with DFX and Bluetooth® technology
- Fully scalable for far and near field applications
- SmartLink® plug & play adapter for universal mounting options
- Durable lightweight aluminium unibody array elements

WAVEHEAD® technology for seamless array configuration

integrated 4-channel mixer for full, quick and convenient control

Bluetooth® stereo audio streaming

Easy scalability with the „slide-and-look“ mechanism

up to 24 curv 500 speakers with one IAMP amplifier

full install flexibility thanks to the SMARTLINK® adapter

in-depth DSP settings and presets

INSTALLATION

CONFIGURATION FLEXIBILITY

TRUSS MOUNTING | POLE MOUNTING | WALL & CEILING MOUNTING

The CURV 500® feels at home wherever there's music playing: in bars, clubs, studios and even as a home entertainment system. It can be permanently installed with versatile wall and ceiling bracket systems wherever perfect sound quality is called for. This is where the benefits of the compact CURV 500® come into their own.

(CURV 500®AVS also available in white!)

One system – several options. The CURV 500® can be installed on the wall or ceiling, depending on the configuration of the space. Up to 4 Array Satellites can be combined, in ascending or descending order, using the discreet fixing modules and the phoenix connectors on the rear side of the SmartLink® adapter. Whatever works best!

GREAT SOUND CAN BE INSTALLED.

SATELLITE COMBINATIONS

BISTRO

Bistros, cafés, clubs or restaurants often require audio systems with a multi-zone layout. The modular design of the CURV 500® installation system enables individual configurations for each zone ranging from subtle background music to dancefloor levels while keeping the same excellent sonic signature throughout the installation.

BISTRO MEDIUM BUNDLE / 12 SATELLITES AND 2 SUBWOOFERS

BISTRO MAX BUNDLE / 12 SATELLITES AND 2 SUBWOOFERS

CONFERENCE MAX BUNDLE / 12 SATELLITES AND 2 SUBWOOFERS

ZONE 1 / FRONT

ZONE 2 / REAR

VOICE

Audio installations for speech reproduction only such as those in lecture rooms typically do not require sub frequency reinforcement. The CURV 500® system's iAMP provides delay compensation per channel to ensure maximum speech intelligibility, imaging and sound quality throughout the installation.

VOICE BUNDLE / 24 SATELLITES
